Addendum No. 3

August 23, 2022

City Project Nos.: 22-001 & 22-017
Wayside Drive Reconstruction and Sewer Replacement Project

Plan holders:

This addendum provides a response to the questions submitted to the City.

Item No. 1:

The following questions were received regarding license classification requirements:

Q(a): "We have a question regarding the attached License requirements. The sentence states that both a Class A and C-10 are required. Should it read "either", or are both in fact required?"

Q(b): "Page 1 in the notice to contractors say that to bid you must have both of the following contractor licenses: Class A and C-10. Is that correct? Just to clarify. The General Contractor has to have both licenses themselves. In other words if I have an A License only and I get a subcontract quote who has a C10 license is that sufficient?"

Q(c): "Please clarify the license requirements on the bottom of page 1 of the Notice to Contractors. Is the Prime Contractor bidding the project to possess a C-10 (Electrical) license? Typically, subcontractors are performing specialty work and possess the required license; does this not suffice as typical on other public works projects?"

Of the 56 bid items on this project, only one bid item pertains to Electrical scope (#56 Traffic Signal Intersection Loop Detectors), and the remainder of the project is Sewer and Roadway rehab."

A: C-10 License requirement may be satisfied through a sub-contractor possessing a C-10 License. Sub-contractor's information shall be listed on the "SUB-CONTRACTORS" list and clearly identified as possessing a C-10 License.

End of Addendum No. 3
